

PRECISION MAINTENANCE BOOT CAMP

4-DAYS of HANDS-ON TRAINING

**FOR SUPERVISORS, PLANNERS, RELIABILITY ENGINEERS
& OTHER ROLES THAT LEAD THE WORK PROCESS.**

DECATUR, AL | NOVEMBER 10-13, 2025

Boot Camp delivers an intense 4-days of training, including instructor demos and hands-on exercises using our running & static simulators. This course is designed to accelerate the essential knowledge and skills necessary for Supervisors, Reliability Engineers, Planners, and other essential roles that are expected to lead reliability improvement. In many cases, these individuals have never been formally introduced to these strategies, processes, and tactics, yet they are expected to be the "go to" source for solving difficult problems and achieving improvements.

TOPICS INCLUDED

- Hands-on demonstrations of common installation and repair mistakes that are made each day by maintenance personnel.
- Identification of frequent assembly errors that can reduce equipment reliability.
- Strategies to significantly extend the life of rotating equipment by minimizing vibrations through correct assembly and maintenance practices.
- Practical exercises where participants improve a high-risk machine into an approved, reliable machine.
- Hands-on exercises will be an accelerated pace for both Skills 1: Assembly, Installation & Rebuild and Skills 2: Precision Bearing Installation & Maintenance. Designed this way so each participant can experience for themselves the key elements of precision assembly, installation, and rebuild skills necessary to enable equipment to run as intended - reliably.

***Certificate Issued upon course completion**

LOCATION *VENUE TO BE ANNOUNCED

DATES /TIMES MON. NOV 10- THURS. NOV 13
7:30 AM - 4:30 PM (CST)

COST \$ 2,995.00 / PER SEAT

*Light Breakfast & Full Lunch provided daily
